TECHNICAL SKILLS

Experienced

C++, Python, SQL, HTML, CSS, Bootstrap

Intermediate

Java, Machine Learning

Beginner

Cyber Security, Back-End Languages

SOFT SKILLS

- Leadership
- Perseverance
- Adaptability

AREA OF INTEREST

- Full Stack Development
- Cyber Security

LANGUAGES

English - Full Professional Proficiency

Telugu   - Speaking Proficiency

Tamil   - Native Proficiency

Aspiring Computer Science And Engineering student with a passion for problem-solving and a Good Foundation in Programming as well as in Computer Technologies

EDUCATION

SASTRA Deemed University
B.Tech Computer Science and Engineering   2021 - 2025
CGPA - 6.5

Town Higher Secondary School

HSE - 85 Percentage   2019 - 2021

SSLC - 78 Percentage   2018

PROJECTS

- **Homophobic and Transphobic Detection**

  This project focuses on detecting and classifying Homophobic and Transphobic comments using Artificial Neural Networks (ANN) with five layers trained on a dataset. This project seems to enhance social media safety and avoid people being hurt.

- **Responsive Portfolio Website**

  I designed and developed this responsive Portfolio Website using HTML. CSS and Bootstrap from scratch. The use of Bootstrap ensures compatibility across different devices.

- **Jump Counter**

  A Python program is developed using OpenCV and Mediapipe module to access the camera and utilize a holistic approach for tracking. This program counts the number of jumps performed by the user.
